

# GROUP PROJECT

**Title: Subscription Management**

**Team Members: Neela, Praveena, Laxmi and Paulomi**

# Project Overview

Created a Web application for IT Expert System to manage the Training Subscriptions. With this tool, student can provide their preferences and System can store and manages the student's preferences.

- Created a Subscription Form using AngularJS using below fields
  - Name
  - Email
  - Phone
  - Training of Interest
  - Comment
- Created a Subscription table with below CRUD REST services
  - Edit
  - Delete
  - List View
  - Reset

# Tools/Technology and Findings

To create a Web application we have used below tools and resources. We have not used database but use Angular display to show the submission results.

- Tools/Technologies
  - AngularJS
  - JavaScript
  - HTML
  - CSS
  - Visual Studio
  - Git
- Findings/Resources
  - W3Schools.com
  - Friend
  - <https://krazytech.com>

# Project Outcome

(Form page with Submit, Reset and View All functions)

## Subscription Form

\* Required Fields

Name \*

Email \*

Phone \*

Training of Interest \*

Your Comment

# Project Outcome

## (Submission page with Edit, Delete and Back functions)

You submitted the following:

Name	Email	Phone	Trainings	Comments	Action
